

CALIBRE TIMBER DOORS

Colours

Our engineered timber range comes in 24 precision water-based, vapour permeable paint finishes and can be coloured internally and externally, with dual colour available to suit specific requirements. If you require a bespoke door colour from either RAL or BS4800 ranges for a large project, we can discuss your requirement based on minimum order quantity. In addition, our timber-clad Security Plus aluminium outer frame can be coloured to match the timber door, finished in-house with no additional production lead time.
